

AABHUSHAN ADHIKARI

Java Backend Developer

Pepsicola, Kathmandu | +977-9863262427 | aaabhushan10@gmail.com

PROFESSIONAL SUMMARY

Detail-oriented and passionate Java Backend Developer with hands-on experience in developing secure, scalable RESTful APIs using Spring Boot and Spring Security. Strong background in PostgreSQL, MySQL, and RabbitMQ with exposure to messaging queues, analytics APIs, and Firebase push notifications. Demonstrated ability to work independently and in team environments while solving complex technical problems.

TECHNICAL SKILLS

Programming Languages: Java, JavaScript, SQL

Frameworks and Libraries: Spring Boot, Spring Security, JWT, Spring MVC, Spring Core, Hibernate, JDBC, JSP, Servlets, Thymeleaf, Mybatis

Databases: MySQL, PostgreSQL

Tools and Technologies: Maven, Postman, Git, RabbitMQ, JavaMail API, Firebase Cloud Messaging, Apache POI, Nepali Date Conversion Library

PROFESSIONAL EXPERIENCE

Backend Developer

Varosa Technology | February 2025 – Present

Project: Shramsansar Job Portal

- Developed CRUD APIs for Job Posting, Training Programs, and Service Listings, including shortlisting and hiring modules
- Implemented JavaMail API and RabbitMQ for asynchronous email notifications
- Created PostgreSQL functions to generate real-time Reports and Analytics APIs for admin dashboards including charts and trends

- Implemented websocket using rabbitmq stump plugin for messaging between users
- Developed Excel Export APIs for job and service provider data using Apache POI
- Built a Nepali Date Conversion Library to convert English dates to Nepali BS for localized reporting
- Integrated Firebase Cloud Messaging for sending push notifications to users based on job status and system alerts
- Developed roles and permissions to ensure APIs could only be accessed from required roles

Project: CloudColleague

- Implemented OAuth 2.0 for login with JWT using Google and LinkedIn
- Used Firebase for live messaging functionality
- Wrote unit tests and integration tests using Mockito to ensure proper service logic
- Integrated Firebase Cloud Messaging for sending push notifications to users based on job status and system alerts

Backend Developer

CS Sewa | June 2024 – January 2025

Project: Chandrapur Palika App

- Designed and developed secure RESTful APIs using Spring Boot with JWT authentication for municipality resource management
- Built endpoints to manage municipal services, including staff information, notices, and document requests
- Developed features for filtered data retrieval and Excel sheet generation for administrative reporting
- Performed comprehensive API testing and validation using Postman to ensure reliability and accuracy

PERSONAL PROJECTS

CRUD Program (Java and MySQL)

- Console-based Java application performing Create, Read, Update, and Delete operations on MySQL

Hospital Management System

- Core Java and JDBC-based terminal application simulating hospital operations

Real Time Chat

- Real time chat application made using rabbitmq and stump plugin websocket

Online Book Registration System

- Spring MVC web application using Thymeleaf and Spring Data JPA for book registration and management
-

EDUCATION

Bachelor of Science in Computer Science and Information Technology Tribhuvan University Affiliated College | 2019 – 2024

Plus Two Science Little Angels College | 2016 – 2018

Secondary Education Little Angels School | Up to 2015

CERTIFICATIONS

- Bachelor Degree in Computer Science and Information Technology, Tribhuvan University
